

sonamba®

Connect to a Better Life. sonamba.com

Sonamba includes one panic button. Additional panic buttons and room activity sensors sold separately.

Includes:

24/7/365 Monitored Personal Emergency Response Service

Sonamba's 24/7/365 Monitored Personal Emergency Response Service responds to emergency button activation; monitoring station will contact user via 2 way or telephone communication, call emergency services (if needed) and notify family members/caregivers of the emergency.

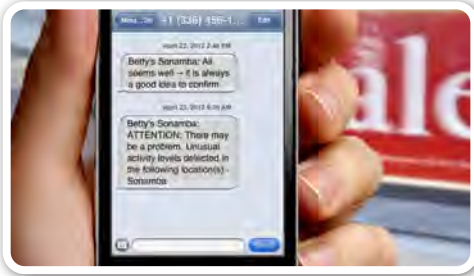

Wellbeing Status Monitoring System & Service

- Activity of Daily Living Monitoring
- Periodic Wellbeing Status Alerts sent to Caregivers Cellphones via SMS
- Automated Medication Adherence/Calendar Reminders
- Social Communication via SMS
- Communicating Digital Photo Frame with Photosharing
- Remote Access via Sonamba Mobile Apps for iPhone/Android and mysonamba.com Web Portal

The mysonamba.com web portal enables caregivers to remotely edit /change medication and calendar reminders, change 'Home' or 'Away' status, even update photos to their loved one's Sonamba. Caregivers can stay updated with their loved one's wellbeing with the Activity History feature.

Sonamba's built-in Activity of Daily Living Monitoring (ADL) monitors motion and sound activity, sending out periodic 'All is Well' or 'Attention Needed' alerts via text message to caregivers / family members' cellphones.

Sonamba's 24/7/365 Monitored Personal Emergency Response Service responds to emergency button activation; monitoring station will contact user via 2 way or telephone communication, call emergency services (if needed) and notify family members/caregivers of the emergency.

Sonamba allows Seniors to communicate (via Sonamba's built-in text messaging function) with their families and caregivers—creating a private social network that also enables patient engagement and proactive intervention by families or caregivers if needed.

Sonamba reminds seniors of their appointment and medication and vitals measurement routines. Caregivers and family members can be notified if a medication or an appointment is missed.

The mysonamba.com web portal enables caregivers and family members to remotely monitor vitals and activity history for the senior. Additionally, caregivers/family can remotely set up the Sonamba and add/change settings, including medication reminders, calendar reminders, etc.

Sonamba has an app for iPhone and Android phones, enabling caregivers and family members to remotely edit/change medication and calendar reminders and send photos when away from a computer.

Emergency response option: If the panic button is pressed, Sonamba can optionally call up to three emergency contacts; meanwhile, all caregivers will be notified via text messages. If this option is chosen, Sonamba's monitored emergency response service is turned off.

Sonamba is also designed to be an attractive communicating digital photo frame with photosharing when not being actively used. Families can add photos remotely.

Sonamba – the *smart* choice for Elderly Care!
