

New Technology That Remotely Monitors the Well-being of Those in Need, While Giving Them a Voice in the Process

pomdevices, LLC to Showcase Sonamba and SonambaPro at American Telemedicine Association 2012, Booth #337

Durham, NC - April 27, 2012 - Now it's easier than ever for families to monitor and stay close to their aging loved-ones, thanks to Sonamba, a new technology from pomdevices, LLC. An easy-to-use device for technology challenged seniors that is placed in their home, Sonamba enables families to share valuable conversations when time is precious. With social communication features similar to Facebook, such as photo-sharing and text messaging, it makes staying connected and interacting simple for busy, working boomers on-the-go.

The 7-inch plug-n-play touchscreen device is packed with social communication features that allow you to remain close, helping to reduce the burden of guilt. Boomers no longer have to rely on a phone to communicate. They can easily exchange text messages and send photos in minutes remotely by accessing the web portal MySonamba.com or using the iPhone App. Now a conversation can be shared without picking up the phone, photos shared without downloading them to a computer and text messages shared without using a mobile device, all made possible with Sonamba. When not in use, the device even doubles as a digital photo frame, allowing aging parents to enjoy their families through pictures.

Recently named "Product of the Future" by *Popular Science*, SonambaPro, a Home Health Monitoring product for seniors, is packed with even more well-being functionality than its predecessor, Sonamba. A user-friendly, non-intrusive device designed to empower patients and their caregivers/family members, SonambaPro offers a new way to improve patient's post-acute care transition. SonambaPro can help hospitals lower their costs by giving families/caregivers the ability to remotely help with a patient's medication adherence and wellbeing, even if they're far away, via their mobile phones or mysonamba.com.

With SonambaPro, families can now receive added insight into their aging loved ones' health through adaptable, lightweight measurement tools such as blood pressure cuffs, weight scales, glucometers and spirometers that record important vitals. In addition to helping reduce readmittance visits for seniors living independently, SonambaPro's affordable price makes it an easy choice for families with seniors that may need more supervised care.

pomdevices, LLC will be showcasing both Sonamba and SonambaPro at the American Telemedicine Association (ATA) Annual Meeting and Exposition (booth #337), an event billed as the world's largest telehealth tradeshow.

Ajit Pendse, CEO and Robert Burke, VP of pomdevices, LLC will be available for interviews during the event. To schedule an interview, please contact Rachel Wells at (919) 956-9400 ext. 117 or rwells@rubberneckmedia.com

About Sonamba

Sonamba, from pomdevices, LLC, is the ultimate communication device that keeps loved ones so close, it's like being home again. A Sonamba in your aging loved one's home is the new way to stay connected everyday - not just in emergencies. It allows you to easily share emails, text messages and photos with family members. It automatically reminds loved ones of their medication routines and alerts you via text or email when its motion/sound sensors detect any change in normal activity. For more information, visit www.sonamba.com. Follow Sonamba on Twitter at [@pomdevices](https://twitter.com/pomdevices) and "like" Sonamba on Facebook by going to www.facebook.com/sonamba.

About SonambaPro
